

1. Create a dgnlib folder under your Terrasolid installation folder (C:\terra64\ dgnlib) and create XML folder under it. (C:\terra64\dgnlib\XML)
2. Copy ribbon XML files from ribbon_xml.zip to thin new XML folder
3. Remove possible previous Ribbon Customizations from Ribbon ECXml File. If you have already made your own Ribbon modifications, you want to preserve please skip this step.

In the MicroStation key-in window, enter the key-in RIBBON CUSTOMIZATIONS REVERTALL.

4. Import Terrasolid Ribbon Customizations to Ribbon ECXml File

1. In the key-in window, enter the key-in RIBBON CUSTOMIZATIONS IMPORTECXML.
2. In the Import Ribbon ECXml dialog, navigate to the Terrasolid installation /dgnlib/xml select the Ribbon menu you want to install and click **Open**.
3. Repeat the step 2 for each Ribbon you want to install

Ribbons will be stored to your personal.dgnlib file which can be found from your Bentley AppData C:\Users\XXXX\AppData\Local\Bentley\XXXXXXXX\10.x.x\prefs folder. You can find more about the usage of dgnlib from Bentley's documentation.

To disable the standard products button menus at start up use the settings / Operation under each installed product and uncheck the Open Main toolbox
